

# IT'S GO TIME.

The RECELL GO® System streamlines preparation of RECELL® Spray-On Skin™ Cells.

## STRAIGHTFORWARD USE:

Designed for intuitive setup and operation

## PRECISE INCUBATION TIME:

Controlled exposure to the RECELL® Enzyme™ designed to optimize cell yield and promote cell viability <sup>1</sup>

## CONSISTENT PROCESS:

Standardized to ensure cell suspension composition with proven clinical benefits <sup>1,2</sup>

## RECELL® ADVANTAGES OVER TRADITIONAL SKIN GRAFTING:

1. Faster re-epithelialization at the cellular level <sup>3-4</sup>
2. Robust healing using significantly less donor skin <sup>1</sup>
3. Reduced pain, faster closure, and improved aesthetic appearance at the RECELL-harvested donor site <sup>5</sup>
4. Fewer procedures for definitive closure <sup>6</sup>
5. Reduction in length of stay for burns <50% TBSA <sup>6-8</sup>

# The proven benefits of RECELL, delivered at the touch of a button.

## STEP 1:

Load the RECELL Enzyme, buffer and harvested donor skin into the RECELL GO® Cartridge.

## STEP 2:

Place the Cartridge into the RECELL GO® Processing Device and press START.

## STEP 3:

Aseptically draw up and apply the RECELL® Spray-On Skin Cells.
